

# reduce water wastage in five easy steps

## 1 Invest in water efficiency

Investment in water efficient devices could give substantial ROI. Small changes like sensor taps can make a BIG difference to consumption.

## 2 Get an expert opinion

Are you missing out on key water efficiency measures? We can help! Our water audit could help identify leaks, assess bills for discrepancies, and improve the way you use water on a daily basis. **Get in touch today.**

## 3 Engage and inform employees

Share your water efficiency knowledge, so your whole team can take action.

Encourage involvement with reward schemes, or appoint a water champion – and stem the flow of water wastage!

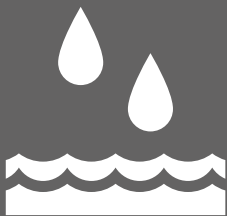

## 4 Carry out maintenance checks

Regular maintenance checks are easily forgotten, but **1 leaking toilet can waste 400 litres of water every day, raising an annual bill by £312!** It pays to make maintenance checks a priority, especially during the colder winter months.

## 5 Harvest rainwater

Save money by using non-potable water where possible and harvesting rainwater for toilet flushing, grounds irrigation etc. **Did you know? Rainwater collection can also help reduce flooding risk!**

To find out how we can help you reduce water wastage, call us on **0203 750 9300** or visit **[www.sesbusinesswater.co.uk](http://www.sesbusinesswater.co.uk)**
